Executive summary

PolicyCortex Demo Enterprise Cloud Platform - NIST SP 800-53 Moderate is documented under NIST SP 800-53 Rev 5 with 287 controls represented for assessor review.

Up to five evidence records are attached per control. Appendix A lists the exact selected records and hashes. Additional observations remain retained; the attachment selection does not establish a passing verdict.

This SSP presents recorded system facts, check observations and separately retained implementation statements for Enterprise Cloud Platform - NIST SP 800-53 Moderate. Missing categorization and owner facts require confirmation. Generating this document does not complete an assessment or establish authorization.

259 pass observations, 11 partial observations, 14 fail observations, 3 not assessed, 0 verified operator attestations and 0 saved SSP records. These counts do not establish full requirement implementation, an approved remediation plan or applicability decisions.

1.0 System Identification

Per NIST SP 800-18 Rev 1, this section identifies the system covered by this Authorization Package and assigns accountability for its operation.

System Name	**Enterprise Cloud Platform - NIST SP 800-53 Moderate**
Unique System ID	demo-collection-006
Recorded system owner	Demo organization administrator
Authorizing Official	—
Information Owner	—
Operational Status	Not provided
Deployment Environment	Not provided

2.0 System Categorization (FIPS 199)

The following values are recorded categorization inputs. Missing values require owner confirmation; generating this document does not perform a FIPS 199 categorization.

Security Objective	Potential Impact	Definition (FIPS 199 § 2)
Confidentiality	**Not provided**	Preserving authorized restrictions on information access and disclosure, including means for protecting personal privacy and proprietary information.
Integrity	**Not provided**	Guarding against improper information modification or destruction, including ensuring information non-repudiation and authenticity.
Availability	**Not provided**	Ensuring timely and reliable access to and use of information.

Overall System Categorization: Not provided — FIPS 199 categorization has not been provided for one or more security objectives.

3.0 General System Description & Purpose

3.1 Purpose

Simulated demo system: Enterprise Cloud Platform - NIST SP 800-53 Moderate

4.0 System Environment

The System Environment section identifies the technical components, boundaries, and interconnections that comprise the authorization boundary. These are the assets the security controls in Section 5.0 are applied against.

5.0 Security Control Implementation

The following sections show each control's recorded check result and implementation review status. This report projection was generated at 2026-11-10T22:05:28.583Z. This is a report-generation timestamp, not an assessment date. Generating this report does not run a new assessment. Recorded observations and retained saved statements require assessor review before they establish implementation.

Status	Count	Notes
Pass observations	259	Recorded checks passed; complete implementation requires assessor review.
Partial observations	11	Partial recorded result; assess remaining requirements.
Fail observations	14	Recorded adverse results; review remediation and supporting evidence.
Not assessed	3	Available records do not establish an assessment result.
Operator attestations	0	Verified receipt and control mapping; independent assessor review remains required.
Saved SSP records	0	Saved SSP statements; provenance and validity require review.

5.1 AC – Access Control

Control ID	Title	Observation / review	Evidence
AC-1	**Policy and Procedures** Recorded check result: Pass. Recorded check score: 90/100. 3 evidence record(s) are included for this control. Pending implementation review. These records do not establish complete requirement implementation or an authorization decision....	**Pass** Pending implementation review	3
AC-11	**Device Lock** Recorded check result: Pass. Recorded check score: 95/100. 3 evidence record(s) are included for this control. Pending implementation review. These records do not establish complete requirement implementation or an authorization decision....	**Pass** Pending implementation review	3
AC-11(1)	**Pattern-hiding Displays** Recorded check result: Pass. Recorded check score: 87/100. 3 evidence record(s) are included for this control. Pending implementation review. These records do not establish complete requirement implementation or an authorization decision....	**Pass** Pending implementation review	3
